DETAILED ACTION

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-10 are rejected under 35 U.S.C.102(b) as being anticipated by Panfil et al (US 6,147,578).

As regards to claim 1, Applicant's attention is directed to 1, 2, 5-7, 9, 10, 12 and 15-17 of Panfil et al teaching a method of designing a magnetic structure for providing monotonic static magnetic field for magnetic resonance analysis, including selecting a first geometry defining a volume-of-interest and selecting a magnetic field query well defined in the first geometry. Further, Panfil et al teach second geometry defining a magnetic structure; and calculating a remanence distribution within the second geometry by using the first geometry, the second geometry and the magnetic field query thereby designing the magnetic structure.

3. As regards to claims 2-8 Panfil et al further teach use of first and second geometries with magnetic field query to design the magnetic field structure and to create remanence functional distribution, and using a set of constraints to maximize and minimize its values (column 13 and 14, and 39 and 40).

4. Claims 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. 4
